Name: Yash Atul Patel
Student ID: 1139858
Subject: COMP-5413

Environment Needed:
-Python v3
-Jupyter notebook
-pandas

Running Steps

Step 1: After setting the environment make sure that csv files and the ipynb files are in same folder.
Step 2: Open the file of the question you wish to run
Step 3: Run the snippets from top to down for the respective questions to get the output.

As the files are in ipynb format it also has output of previous runs. Some snippets will require quite a bit time to run.

Note: Running all questions at same time will require quite high ram so its recommended to run 1 question at a time.
